

CNY-ASSP

Bi-Monthly Newsletter 2019-20

August 2019

Presidents Message:

Good Day members, it is summer again and we the officers (plus a few other dedicated volunteers, thank you very much!!) of the CNY chapter have been busy trying to set up next year's meeting events and bring together the remaining bits and pieces for September's PDC. We had our yearly planning meeting just a couple days ago and have put together a schedule and as usual a few blanks need to be filled in (see to the right) but we are working on that. The calendar will be updated as we lock in speakers and locations.

Our busy staff will be updating our members ability to purchase an annual pass for the 2019/20 season in their free time, this pass of course gets you into all the monthly chapter meetings but not the PDC or WiSH. The cost is \$100 so basically if you make all the meetings one is on the chapter.

FYI, CNY ASSE is now on LinkedIn.

Last newsletter before the Sept PDC, don't forget to register and "See You There"!

Eric

New Members:

Jodi Deep
Dennis Hesse
Mike Burk
Aleana Daniello
Michael Lovell
Steve Tighe
Dominic Castiglia

Welcome to all new members!

New Jobs Listed:

-Health and Safety Advisor, Black & McDonald (Syr)

Feb. 20, CBD, Green Gate

Mar., Dig Safe Seminar

Apr. 16, Eye Health, Danzers

May 13th, Pre-WiSH TBD

May 14, WiSH

June 18, Awards Meeting

FOCUS ON SAFETY – Housekeeping

To some people, the word “housekeeping” calls to mind cleaning floors and surfaces, removing dust, and organizing clutter. But in a work setting, it means much more. Housekeeping is crucial to safe workplaces.

The practice extends from traditional offices to industrial workplaces, including factories, warehouses and manufacturing plants that present special challenges such as hazardous materials, combustible dust and other flammables. Experts agree that all workplace safety programs should incorporate housekeeping, and every worker should play a part. Here are some tips for effective workplace housekeeping:

- Keep aisles, walkways, and exits clear of tripping hazards
- Clean up spills and treat slippery conditions immediately
- Properly store combustible materials and keep flammable Materials away from ignition sources
- Clear clutter by removing debris and putting tools away after use.

While OSHA regulations require that each working surface be cleared of debris, including solid and liquid waste, at the end of each work shift or job, whichever occurs first, to fully realize the benefit of a clean workplace, it is often easier to maintain good housekeeping throughout the course of the job and workday.

Remember that dry sweeping is prohibited on construction sites and many industrial and commercial sites per the Respirable Crystalline Silica Regulations; Sweeping compound, wet sweeping or HEPA vacuums must be used!
